Professional Summary

Motivated and eager-to-learn .NET Developer at the beginning of my career, with a growing skill set in C#, ASP.NET Core MVC, Entity Framework, and SQL Server. Currently expanding my knowledge in building web applications, database-driven systems, and REST APIs. Also familiar with modern JavaScript frameworks for creating responsive and user-friendly interfaces. Passionate about writing clean code, improving problem-solving skills, and turning ideas into working solutions through continuous learning.

Education

Bachelor's in Information Technology

Expected July 2026

Bahria University — Islamabad, PK
CGPA: 2.94/4.0

Relevant Coursework: OOP, Data Structures, DBMS, Operating Systems, AI, Data Science, Database Administration

Intermediate in Computer Science

2020 – 2022

Fazaia College — Mianwali, PK
Percentage: 72%

Technical Skills

- **Languages:** C#, JavaScript, Python, SQL, HTML/CSS
- **Frameworks:** ASP.NET Core MVC, Entity Framework, React, Next.js, Express.js, Flutter
- **Databases:** Microsoft SQL Server, MySQL, MongoDB
- **Tools & Cloud:** Visual Studio, VS Code, Git/GitHub, AWS, Clickup, ODOO
- **Concepts:** OOP, MVC Architecture, REST APIs, Stored Procedures

Projects

FusionnerPDF – PDF Merging Tool

Next.js — TypeScript — AWS

Built a responsive web application that allows users to merge PDF files using a drag-and-drop interface. Integrated client-side file processing, styled with Tailwind CSS, and deployed the app using AWS.
Live Demo: fusionnerpdf.net

Superstore Database System

MySQL — Database Design

Designed and implemented a normalized database schema for a superstore using EERD. Wrote optimized SQL queries including joins, constraints, and complex indexing to ensure data integrity and performance.

Movie Recommendation System

Python — Flask — Pandas

Developed a movie recommender system using collaborative filtering techniques. Cleaned and processed large datasets using Pandas and deployed a simple web interface using the Flask framework.
